

William Yim

resident's Message

My favorite seasonal flower in the year is Flame Tree (Delonix Regia) also named as 鳳凰木 or 火鳳凰. The burning red color flowers piles on the tree top just like burning fire on the tree top. These flowers start to bloom when it is getting to mid-summer, when the weather in Hong Kong is very hot and humid. These trees are common in many locations in Hong Kong, such as Victoria Park, Kowloon Tong and New Territories.

The flowers always give me very good mood since I was young at school days because it will soon be the summer holiday. I love summer holiday, sun and beaches... Waoooo! I love it. Yet, it tells me now that I can take a holiday after a busy Rotary presidency year.

Right after the Rotary Intercity meeting and The One ceremony on 15th and 16th May, I immediately jumped on the airplane and flew to Germany to join a Biotech exhibition which one of my associations participated. And then, I flew to UK for a business meeting. Returning to HK on Sunday, I could chair our club meeting on the following day. What a packed schedule I had.

Two of our signature service projects 'Sunshine Teens' and '潮看Teen 空' came to an end. We had their closing ceremonies at NTHYK Tai Po District Secondary School. Witnessed the students having so much improvement after the last 9 months, we felt so thankful. All efforts we put in are just worth. Thanks for the support of Kenneth, Wilson, Patrick, Jun and many of our club members to make the two projects successful.

We had our two days District Conference on 27th and 28th of May. It is an indication to us that this Rotary year is coming to the end. At the District Conference, we had a review on the overall performance of this Rotary year and shared the vision and objectives in the coming one. And, also in this event, most Rotarians who had contribution to Rotary foundation were also recognized with the presence of our special guest Rotary Foundation trustee Ken. We were recognized as 10th Highest All Time Contribution Club to The Rotary Foundation in 2016-2017, Club Contributing over US\$1,500 to Polio Plus in Year 2015-2016 and US\$100 average giving and 100%-member participation in 2016-2017. Thanks PP Louis and all the members for their contributions.

Before Bebe and I jumped on the airplane for Rotary International Convention, I have an important thing to do. It is to receive a technology award for Nobel Laureate Series for the rapid diagnosis point of care system my company has. I am very glad and proud that one of my signature inventions be recognized. Thanks for the time and effort of our research and development team in making my dream come true.

Bebe and I then got on our trip to the Rotary International Convention in Atlanta. This is my first time in my Rotary life visiting RI convention. RI Convention is an important Rotary event that I think any Rotarian must visit at least once in their life time. For me, I took this chance to visit my 30 year's old lost friend in Atlanta. He was an inventor,

too. We both worked on the design of a revolutionary telephone product and we had won the Pacific Bell Best Business Solution award in California, Best business solution granted by New York Bell. We also won the Governor's Awards in 1990 and 1991 in Hong Kong presented by Sir David Wilson, the Governor of Hong Kong at that time. I was very proud to have a good friend and business partner like Jack. We worked together so synchronized and with tacit understanding when we were young, I was about 26 and he was about 30. We lost each other's contact after we decided to discontinue the business due to a lot of major changes in telecommunication regulations. He went to study law and is now an attorney at law mainly for criminal cases, and I started another company on advanced manufacturing technologies. After so many years, I found him on Google. I am so glad that we had a chance to meet again. I arrived a few days earlier before the Convention. We spent time for old school. It was really wonderful.

Since I revisited Atlanta after so many years, I could not miss the chance to visit Coca Cola museum, the Arch, the Ocean World, Fernbank Museum of Natural History and History museum and Ruby Fall with my spare time.

The convention started on the 7th. There were nearly 40,000 Rotarians coming from more than 170 countries in the world and a lot Rotarians from Hong Kong including DG Eric, DGE HW Fung, DGN YC Ho and many others. This year is especially important as Rotary is celebrating the Rotary Foundation 100th Anniversary. Most shocking news are that there are 1,500 chartered buses for this RI Convention. It was really eye opening. What was as well an overwhelming but encouraging news being that the end polio has raised US\$1.2 billion in a night and yet only used US\$1.6 billion over the years. Moreover, US\$29 million has been generated in wages for local employees which equivalent of over 700 full-time jobs. Bill Gates was also invited to the convention in giving an inspiring speech to Rotarians all over the world.

By the way, we could not miss the chance for fellowship. Bebe and I have attended the DG dinner. It was a wonderful and enjoyable 11 days experience for me.

I am very glad that I shall soon pass the Presidency to Roger. He graduated from the University of Hong Kong with an honours degree in Electrical and Electronic Engineering, Roger has entered the railway sector where he has accumulated over 20 years of experience in the design, operation and project management of existing and new railways.

He is also a keen believer of life-long learning who has been walking his talk. He has embarked on further studies in areas of finance, alternative disputes resolution, computer science, business and legal studies. Today he is a practicing barrister, accredited mediator, arbitrator in addition to a chartered engineer.

Roger joined Rotary Club of Tai Po in 2007 and took up various posts in our club as Director, Secretary, Club Administration Chair, Vice President and President Elect. Roger married May with a daughter Katherine and a son Fred. Perhaps influenced by his move to enter the legal profession, Katherine is now also pursuing a study in law at university. Fred is now awaiting the result of the Hong Kong Diploma of Secondary Education Examination.

After all, I would say being the President of RC Tai Po is enjoyable but really challenging. I certainly learned a lot. I had the most experiences with intensive rotary schedule and found myself far better than before in many aspects. Most importantly, I learned more about Rotary and the spirit within.

Claire Mak
Editor Says

Everyone has 5 senses. The eyes, ears, nose, mouth and skin encompass sight, sound, smell, taste and touch. Through the correlation of these sensory organs, there will be relevant signals for the body and mind. Sometimes, people tend to experience one further sense, one which may conveniently be called the 6th sense.

This 6th sense is akin to premonition. This is a strange feeling that you sense something may happen but you don't know the details or what it is about. Such extrasensory perception {"ESP"} involves reception of information not gained through the recognized physical senses but sensed with the mind. It is sometimes considered as supernatural power. In the vast universe, there must be some force or power that human beings may not perceive or comprehend. Such power may not be seen and may not be learnt. Some people have stronger power than others; but ESP is definitely more prominent with animals and birds than human beings. Their instincts will lead them to extraordinary behaviour to avoid natural disaster. In the realm of receiving warning signals of disaster, insects and reptiles are a lot more acute than humans. This may be a result of their innate survival instincts being better developed than those in human being. The latter lives in unnatural habitat for too long and so their reception to nature's warnings becomes obtuse.

That is also why children's senses are very sharp. These come with birth. But as the children grow up, these senses get eroded gradually as there is limited use of survival instincts. Some people say this can be *regained* by certain training and to find "the other me".

On that note, it is interesting to consider: Is there another 'me' somewhere? The two of us may not share the same outlook but we may be able to feel the presence of each other. Some studies say that's a result of the brainwave connection just as one of the twins will be able to think and feel what the other twin thinks and feels. Their ESP are much stronger than ordinary people.

Technology has advanced, but there are still a lot of inexplicable happenings. The more you want to find out, the more you became puzzled - like you have been sucked into a knowledge black-hole. To someone like me who is not scientifically conversant, there are black-holes within black-holes. It is like the unproven belief that there are living creatures in another planet or on the other side of the Milky Way. They just wait to be found and let human understand.

The talk about the universe, the Milky Way, the planets ... brings to mind our 26th Annual Ball "Galaxy Trek". It marks the time when we approach the end of a dark era and the beginning of a better one when, hopefully, plans or information or schedules of the District or of the Club are no longer sucked or stuck in black-holes. Best wishes Tai Po!

Peter Lam

Rotary Information

I believe that in Hong Kong, our medical services overall is very good with sufficient modern equipment to take care of our needs. However, in less developed countries or cities like in Brazil, there are often shortage of certain medical facilities and that is where Rotary support becomes important. Let us look at one example here of a Grants project that saves infant lives.

Linked through sister cities, Rotarians save newborns in Brazil

From RI News by Vanessa Glavinskas

A mother is in labor, and she's frightened. Her baby isn't due for three months. The closest hospital is 30 miles away, and although she makes it there in time, the baby is born weighing barely 2 pounds.

And there's another problem.

The hospital's neonatal intensive care unit has only seven incubators, and all are in use, so the baby must be transferred to another hospital to receive the critical care he needs. If he survives the transfer, his parents will need to find a way to make trips to that hospital for months.

Many new mothers were facing similar situations at Dr. Leopoldo Bevilacqua Regional Hospital, a state-run facility in Brazil's Ribeira Valley. Lack of equipment meant some of the hospital's most vulnerable newborns had to be transferred, which was a factor in São Paulo state's high infant mortality rate.

"There are two realities here: people who can pay for a private hospital and those who can't," says Lina Shimizu, who spearheaded the project for the Rotary Club of Registro-Ouro, Brazil. Those who can't, she says, often have to travel long distances to get to a state-run hospital such as Leopoldo Bevilacqua, which serves 24 towns.

By partnering on a Rotary Foundation global grant with two clubs in Nakatsugawa, Japan, Brazilian Rotarians raised \$172,500. They funded equipment including five incubators for the hospital's neonatal intensive care unit (NICU), which nearly doubled the hospital's capacity to care for fragile newborns. In 2013, 129 babies were admitted to the NICU; since the completion of the project, the hospital has been able to care for about 220 babies per year.

Other equipment provided through the grant included five ventilators, a bilirubin meter, three heated cribs, five vital-sign monitors, and a super LED micro processed phototherapy unit to treat babies with jaundice. The grant also funded the cost of publicity to inform residents about prenatal care workshops conducted by area health workers. The publicity campaign aimed to reach mothers in remote areas who may not know what services are available to them or about the importance of prenatal care and breast-feeding.

This global grant marked a turning point for Rotarians in Nakatsugawa, who had stopped contributing to international projects after experiencing difficulties on a past grant. The difference this time was in the relationship between the cities of Registro and Nakatsugawa, which established a "sister city" affiliation in 1980.

"This was initially a project of another Brazilian club, but they spent five years trying to find a partner and funding," Shimizu says. "We were able to implement it in three years because of our sister city relationship."

Rotarians from both cities meet regularly to foster their friendships, alternating between Brazil and Japan, and because of their close relationship, the Japanese Rotarians felt confident that their financial contributions to the project would be managed well. In addition, Shimizu, who is of Japanese descent and speaks fluent Japanese, helped build trust and effective communication.

A group of Japanese Rotarians visited the NICU after the project was completed. "After 37 years," says Mitsuo Hara, a member of the Rotary Club of Nakatsugawa, "there's a friendship and bond between Rotary members of both countries."

Rotary Foundation Centennial Information Page

PP Peter Lam

For the past 11 months of this Rotary year to celebrate Rotary Foundation Centennial, I have covered various topics and information related to The Rotary Foundation (TRF). It would be nice to round up with a report of our club's involvement and achievement in this area which we should be proud of.

Contributions to TRF

Our club has always been very supportive of TRF Annual Program Funds (APF) and Polio-Plus contributions. Credit must go to our long time TRF Chair PP Louis Tang and generous members. For over 10 years continuously, we have been an EREY (Every Rotarian Every Year) Club which means every member contributed at least US\$100 to APF and in fact our annual contributions for the past 10 years ranged from US\$11,900 in 2006-07 to all time high of US\$44,550 in 2012/13 and US\$24,300 in 2016/17. Our club achieved 100% Paul Harris Fellow (PHF) club status during PP Dennis Lo's year 2009/10 and have been a top 10 contributor in our district in the past several years. Currently, over 90% of our members are PHF or multiple PHFs and we are proud of having many Major Donors.

Major Donor Level 1 accumulated contributions of US\$10,000 to \$24,999: Francis Au, Ron Chung, Anthony Hung, Peter Lam, Man Mo Leung, Wilson Lam, Jacky Sung, Frankie Wu
Major Donor Level 2 accumulated contributions of US\$25,000 to \$49,999 Louis Tang, Kenneth Wong, Matthew Yum
Bequest Society Level 2 (US\$25,000-\$49,000): Wilson Lam
RCTP All-Time Giving to TRF US\$382,067.12 (as of June 2, 2017)

Involvement in Group Study Exchange (GSE) and Ambassadorial Scholarship

RCTP is proud to have produced two GSE Team Leaders: PP David Loie (to Tennessee USA 2001) and PDG Kenneth Wong (to San Paolo Brazil 2010). For the 2001 GSE program, our former Rotaractor and now CP Fonia Wong of RC Central was also member of the team. Our Rotaract Club of Tai Po PP Sheena Cheng, through our nomination, also became a Rotary Ambassadorial Scholar to study in Nebraska USA in 2009/10.

Participation in Grants Projects

Although the Global Grant dance training project proposed by our sister club RC Makati San Lorenzo was not approved by TRF, this Rotary year we successfully obtained the District Grants for our Elderly health check project (身心康檢齊參與) for grants amounting to US\$3,054. In Natalie's year 2014-15, we joined hands with RC Makati San Lorenzo for the "Tuloy Integrated Food Production Through the Science of Aquaponics" global grant project in Laguna Philippines with Grants of US\$46,500 from TRF, District Designated Fund (DDF) from our district US\$8,000 and our club contributed US\$10,000.

Global Grant used to be known as Matching Grant (MG) and our club acted as host club in 2009/10 to provide hi-tech prosthesis for four children who were victims of 512 earthquake in Sichuan China in 2008. Our sister club RC Taipei and RC North Rockland from New York, USA were our partners in which we contributed US\$4,500 but obtained DDF from two districts and cash contribution for total budget of US\$24,360. In 2008, we supported our sister club RC Alabang with US\$3,000 in providing safe drinking water facilities to the Tuloy Street Children Village which obtained MG of US\$9,500 from TRF.

Joint Youth Clubs Meeting 2017

Jacky Sung

22nd of May was definitely a fruitful day for our Club and our youth clubs, when the annual joint youth clubs meeting was held in Wu Yee Sun College of the Chinese University. Over 60 Rotarians and youths from our Club, Rotaract Club of Tai Po, Rotaract Club of Wu Yee Sun College, Interact Club of Tsung Tsin Christian Academy and Interact Club of Taipo Schools attended this meeting.

The meeting started with a couple of ice breaking games to facilitate all participants to know each other better, and followed by a tea break.

All four youth clubs presented their service plans for this Rotary year and shared their service experiences in the meeting. As their mother club, we were very delighted to see all these accomplishments they have achieved.

The highlight of the day was to have PP Cobe Tsang from Rotary Club of Tolo Harbour and our Deputy Youth Chair Wilson Woo to give their speeches. As both of them were once the members of Rotaract Club of Tai Po, they shared their life experiences and insight of growing from Rotaractors to Rotarians.

All participants were then divided into four groups for further discussions and sharing. Group photographs were taken after the meeting adjourned.

Last but not the least, I would like to give special thanks to the great efforts contributed by all participants and particularly President Maxine, Deputy Youth Chair Wilson Woo, RAC Taipo team and RAC WYS team to make this event a success. Everyone enjoyed the meeting very much. We all look forward to more joint clubs meetings, and joint service projects in the near future.

2016-17 District Conference Day 1 27.5.2017

Dorothy Chan

On the rotary International District 3450's calendar, there are a few big events that you just can't miss. Surely District Conference is one of them. This year, it was held on 27th and 28th May at the L'hotel in Tsuen Wan. It started off with the House of

Friendship followed by the Leaders' Luncheon, then the Opening Ceremony and the remainder of the programme. I had the pleasure to join the Luncheon and it was a fantastic opportunity for the Leaders to mingle and prepare themselves for the yet to come seminars. During the Luncheon, one of the highlights was that we had Liz Bousser from the French international School, who won the Song Contest of the Peace Committee performing for us. Her singing was moving and we all enjoyed it very much.

DG Eric Chin officiated the start of the District Conference and introduced our Guest of Honour, Mr. Tim Lui Tim-Leung, BBS, JP, Deputy, National People's Congress of the People's Republic of China who gave an interesting speech on 'Nurturing Young Generation for the Changing World - from the Education Perspective'. A topic that is very close to the heart of Rotary and the wider communities. For Albert Einstein once said 'Our death is not an end if we can live on in our children and the younger generation. For they are us; our bodies are only wilted leaves on the tree of life.'

Following the elevating speech, we had the breakout sessions with topics ranging from 'Strategic Planning Plan to 2020s' to 'Engagement as PI Tool'. For a moment, it was like Sophie's Choice for the participants as all topics were very informative and appealing. One of the benefits of these sessions was that the audience were able to pose questions to the panellists and had constructive discussions on topics that could affect our Rotary lives. The dialogues could only be helpful for the growth and sustainability of our District.

Of course, no major event in Rotary can wrap up without fun. Day 1 was rounded off with a fun All-Star Governor's Banquet. Taichi performance by DG Eric Chin, singing and dancing and all were very enjoyable. RCTP got a little honour that evening with our very own DS Natalie winning the Best Dress Award (for Ladies) - a little glamour that highlighted DS Natalie and our Club.

What a great Day 1.

2016-17 District Conference Day 2

28.5.2017

Roger So

Day 2 of the District Conference began with a morning exercise of Tai Chi exercise led by Wu Shi Master Dang Xu. This was a good exercise to help us relax our bodies and refresh our minds.

Afterwards we had the Second Plenary Session focusing on New Generation, chaired by DGN YC. Representatives from Rotaract, Interact, RYLA (Rotary Youth Leadership Award) and Rotary Scholar took turn to share their exposure and adventure during last year. From their sharing they all treasured the opportunities and exposures which they gained through Rotary.

The high time of this session is the speech by RIPPR (RI President Personal Representative) TRF Trustee Kenneth Schuppert, Jr on the State of Rotary Worldwide, and the speech by Ms Florence Hui, JP, Under Secretary for Home Affairs whose topic was "The effects of the 'Belt and Road Initiative' to the future of our youths in Hong Kong".

During the Rotary Foundation Lunch a number of prizes award were presented. Our club won the following awards:

- Clubs Contributing over US\$1500 to Polio Plus for RY 15-16
- 10th Highest All Time Contributing Club to TRF in RY 16-17

In the afternoon we have the Third Plenary Session focusing on Business Session. This includes the adoption of District Financial Statement for RY 15-16, conference resolutions and summary reports on breakout sessions of the previous day.

Afterwards is the final plenary session. There was a dialogue with our future leaders of the District where we have the opportunity to know better about our District Future Leaders DGE HW Fung, DNG YC Ho and DGND Wilson Cheng.

Asia Pacific Regional Rotaract Conference Experience

EVP Hilary Leung of RAC WYS College

This is our first time to join APRRC, which is an unforgettable experience comprising of interaction, fellowship and fun.

One of the highlights of the programme must be the country reports. They showed how a continental conference works and it is surely a new and surprising exposure to us. We got to know the great works of different Asia Pacific Rotaract clubs and were deeply impressed by their contribution. Our club, with just a few years of experience, would strive hard to excel just as our friends do.

Another thrill of the programme was the Rotaract Festival and Cultural night. Rotaractors dressed in their traditional clothing representing their own country, like qipao and kimono, and enjoyed the evening together. A variety of festive booths sharing fascinating culture, especially about food were set up by our friends from various places. We shared our souvenirs and talked about our local culture with one another joyfully.

The joy extended all the way to dinner time. While we were enjoying buffet dinner, Rotaractors from different districts performed on stage showing their talents in dancing. The winning Mr. and Mrs APRRC also gave brilliant and eye-catching performances on stage, showing us the local culture of their districts. This pushed the thrill to the highest point and we had a good night with fellowship and interaction built.

APRRC is not only a continental conference but also a great occasion for Rotaractors from all over the world to gather, share thoughts and build friendship. Although we come from different places and speak different languages, we are united in the world of Rotaract. The fellowship will last beyond the trip and we together will work for what the world should be.

2016-17 Sunshine Teens Closing Ceremony

Patrick Fong

Due to red and black rainstorms on 24 May 2017, the closing ceremonies of Sunshine Teens and 潮看Teen空 2016/17 were deferred to 31 May 2017.

1) Sunshine Teens 2016/17 Closing Ceremony

It was a sunny and warm day. Led by P William, PDG Anthony, PDG Kenneth, PP Peter, PP Jacky, Rtn. Caren, Rtn. Wilson Woo, Rtnn. Bebe, Rtnn. Mary and I represented RCTP to attend this event. The school hall was decorated with Pokemon balloon and many colorful items. All of us were warmly welcomed by the students at the reception desk where handmade music boxes, coin bags and book protective covers were placed. It was really amazing to see all these items produced by the students and their parents and we shared their experiences in the production process. Some of our members suggested that these items be used for fund-raising to eventually finance the project, Miss Lee, the Vice Principal, Kennis and Abel of The Salvation Army plus other teachers also shared with us their opinion on this idea.

Abel and two students were the MCs of the event. Opening speeches were delivered by P William, Miss Lee and Kennis, followed by performances of the students. A group of 9 students played the song "My Neighbour Totoro" (龍貓) using ocarina (陶笛). After that, 5 students performed magic show. One magician invited Rtnn. Bebe to be her guest to perform the "magic water" show.

This year, the students had participated in cake-baking classes, hand-made dolls classes and balloon classes this year. They thanked RCTP for sponsoring the scheme and the learning programme which helped them to build up self-confidence and communicate more effectively. Before the big group photos, some students prepared a 'Balloon Dog扭狗狗氣球' as souvenir to P William to show their appreciation to RCTP's kind sponsorship. They also prepared birthday cake music box to all of us as souvenir. At about 4:45pm, we all moved to 5/F floor to attend the Closing Ceremony of 潮看Teen空.

潮看Teen空 2016/17 Closing Ceremony

Patrick Fong

Students, parents, teachers and Hei Sir of the Salvation Army were there when we entered the room. This project teaches students to make pizza and cookies and it was time for us to taste and enjoy their products which were really good. Hei Sir was the MC and speeches were delivered by P William, Ms. Lee and Kennis.

Two parents shared with us their feeling about the project. They found that their children had a positive change (with more self-confidence, more concentration and more initiative) after joining the programme. Student Poon shared her experience in the 3-day internship in Pets Home. She was very sad when she saw pets were abandoned by their masters. She said that people should love and take care of their pets, and that love was very important when people decided to keep pets. She added that she was lucky to have her parents and friends loved her very much, and she encouraged students to be more positive.

Other students found that they understood more about their strengths, weaknesses and objectives after joining this programme. Two students wished to apply for VTC Building Services Engineering after finishing F.3 this year. Ah 'Kei' (阿纪), old girl who joined this project eight years ago, came back to share her experience and encouraged students. PDG Kenneth also advocated and exhorted students to participate in this meaningful project.

We presented certificates to the students and a happy group photo was taken afterwards. The event was closed at 6 pm.

Finally, I would like to thank P William, all members & spouses, the school and The Salvation Army who have given support the projects. My sincere thanks also go to PP Peter who took many photographs for our sharing.

R egular meetings

22nd May 2017

Members warmly welcomed speaker Rotarian Lynna Wong and former member PP David Loie.

When Rtn. Lynna Wong challenged us with the question "How much do you know about coffee?" audience were all attentive as she explained in detail the types of coffee, their origins, the roasting, the grinding and the coffee trade. She simply captivated our attention and we seem to know a little more than differentiating Robusta from Arabica.

The nice bottle of Japanese Whisky given out by Wilson Woo was won by PDG Anthony. Cheers!

Minghay delivered a Vote of Thanks in appreciation of the vast coffee information imparted by knowledgeable Lynna.

29th May 2017

Welcome back Benjamin and belated happy birthday wishes to you. Thank you for contributing happy red box.

RCTP's TRF contribution was well recognized by awards of banner and certificates.

29th May 2017

The Manager of Kowloon Cricket Club Mr. Greg Hartigan, accompanied by Membership manager Ms. Mivilia Yau, gave an interesting recount of "A History of Kowloon Cricket Club."

Who better than former KCC president CP Donald to deliver a vote of thanks?

Many happy returns May birthday boy and girls: May, Benjamin and Wanda.

PP Dennis won the lucky draw prize of 10 x \$50-dollar supermarket coupons from PP Pearl.

Good news abound! PP Pearl announced her son's successful marriage proposal and PP Dennis announced her daughter's wedding in December.

5th June 2017

Ms. Vivian Ching, presented a different perspective to art as she promoted "Happy Art With Vivian Ching".

Speaker Vivian Ching was flanked by visiting Rotarians from Rotary Club of Tsimshatsui and Rotary Club of Metropolitan HK.

Patrick gave out a bottle of champagne for raffle draw and Benjamin emerged as the lucky winner.

PP Pearl announced details of arrangements for welcoming sister club members to our annual ball.
